Patient ID: 2024020003

Name: Md REIS UDDIN SEKH

Age: 36 Y

Sex: M

Date: 01-Feb-2024

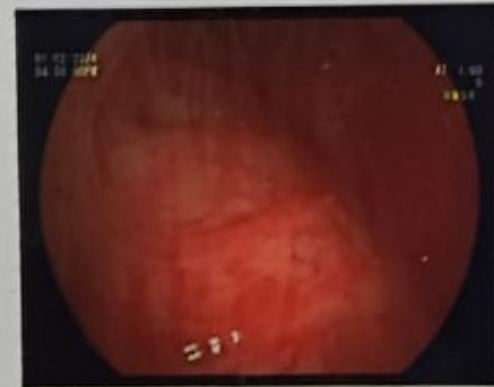

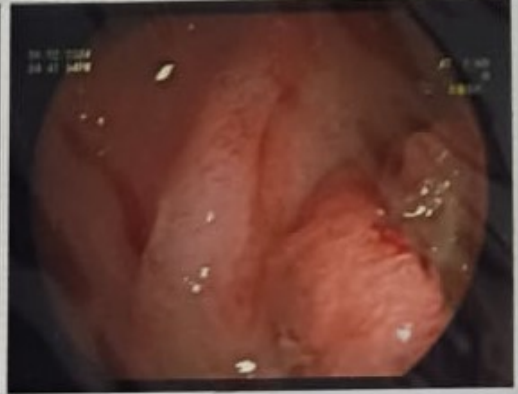

Ref By: Dr. DSSK

Study: DOUBLE BALLOON (DBE)

Examined By: Dr. Srijan Mazumder DM(Gastroenterologist)

Indication: SAIO

Hospital ID: 238759

Double Balloon Endoscopy Report

INSTRUMENT : FUZINON Double Balloon Enteroscope (EN-530T)

SEDATION: ASA PS II. Procedure under Propofol TIVA - uneventful.

INDICATION : Recurrent partial small bowel obstruction

SEEN UPTO : 1.8 m of ileum through retrograde route.

FINDINGS: At about 1.8 m into ileum, there was a geographic looking ulcer noted with gross axis deviation and surrounding edematous mucosa. Narrowing could not be appreciated. Ileal mucosa caudal to it was normal. Biopsy from the ulcer attempted but scope could not be positioned. Visualised colonic mucosa was also normal.

IMPRESSION: Ileal ulcer - likely Crohn's disease.

Adv. Refd. to surgeon for exploratory laparotomy and resection-anastomosis.

Dr. Anasua Bandyopadhyay
M.D Anaesthesiology
