

Patient ID	: GN0000605436	Encounter Type	: Outpatient
Patient Name	: Ms. Sandhya (echs)	Encounter ID	: 127414140003
Age	: 17Y	Sex	: Female
Specialty	: General Speciality	Attending Practitioner	: Dr.Subodh C. Pande (HMC 4 519)
Visit Date	: 17/09/2019 09:23		

Radiation Oncology Evaluation Note

Ms. Sandhya has presented for IMRT Planning procedure.

Comorbidities : No known comorbidities. NKDA.

Brief history and clinical profile : Ms. Sandhya is a 17-year-old left handed female and a biopsy-proven case of Alveolar RMS of Left Hand, intermediate risk and stage 2 disease. She has been treated with 4 cycles of VAC with excellent response and now advised Radical Radiotherapy to primary site. She presents today for IMRT Planning procedure.

Present status : She has no complaints. She is able to hold pen and has full power of muscles of left hand but has mild restriction of very fine movements of left hand fingers. No fever, cough, nausea or vomiting. She has no bladder or bowel problems. Her sleep and appetite are normal. She is performing her ADLs independently. She underwent the following investigations on 12/09/2019 : Hb 12.2 gm; TLC 6600/cmm; Platelets 282,000/cmm; BUN 5 mg; Creatinine 0.5 mg; Uric Acid 4.1 mg; Sodium 138 mEq/L; Potassium 4.2 mEq/L; Total Proteins 7.5 gm; Alb/Glob - 4.7/2.8 gm; Bilirubin 0.9 mg; SGOT/SGPT 46/36 U/L; GGT 21 U/L; S Alk Phos 57 U/L.

EXAMINATION : General condition is good with no pallor, icterus or pedal edema. Pulse rate is 78/min, BP 110/60 mmHg, weight 55 kg. Pain Score 0/10. Chest shows normal breath sounds bilaterally. Abdomen is soft with no palpable hepatosplenomegaly.

Procedure Undertaken Today: Ms. Sandhya was subjected to preparation of an Immobilization Cast of hand region for purposes of accuracy of delivery of radiotherapy on a sustained basis which was followed by undertaking a Planning CT Scan with the cast in position and marking on scar for radiation therapy planning.

The entire procedure was completed uneventfully.

Her CT images would be used to undertake the required treatment planning in the next few days.

Patient asked to report for starting IMRT tentatively on **25/09/2019 at 2.00 pm**. but we would like her to call us up on phone at about 10.00 am on 24/09/2019 to confirm the appointment. In case of confirmation, she should have her lunch by 12.30 pm and report for treatment at 2 pm on appointed day.

Meanwhile, she should continue her routine medications.

For any further queries, she can contact our Departmental Coordinator at 8860611660 or 0124-4800867.
